

The Journal of Research and Health (JRH) is pleased to announce a Special Issue on Artificial Intelligence Trends in Public Health.

🧠 Artificial Intelligence is transforming healthcare, from medical signal analysis to personalized medicine. This special issue will focus on innovative AI applications that are shaping the future of public health.

🔑 Key Areas Include:

- ✓ Analysis of Medical Signals and Images
- ✓ Explainable AI Techniques in Medicine
- ✓ Internet of Medical Things (IoMT) & Remote Monitoring
- ✓ Large Language Models in Disease Diagnosis
- ✓ Detection and Prediction of Brain Disorders
- ✓ Wearable Devices for Personalized Healthcare
- ✓ Federated and Edge Learning in Medicine
- ✓ Generative AI Models in Healthcare
- ✓ Fuzzy Systems and Applications in Public Health

👤 Guest Editors:

Afshin Shoeibi (University of Granada, Spain)

Mohamed Deriche (Ajman University, UAE)

Jónathan Heras Vicente (University of La Rioja, Spain)

Ahmad Shalhaf (Shahid Beheshti University of Medical Sciences, Iran)

📅 Timeline:

Submission Open Date: 30/04/2025

Final Manuscript Submission Deadline: 30/12/2025

🔗 For more details, please visit: www.jrh.gmu.ac.ir

We warmly invite researchers and practitioners to contribute and share their latest findings in this rapidly evolving field.
